

Switches and Buttons

EMERGENCY STOP VITATIO

The VITATIO is a special emergency stop switch, which can be used in machines, vehicles and other plants. This can thus be set to a safe status in the event of, or to prevent a dangerous situation. The VITATIO satisfies the standard IEC 947-5-5 and is a fool-proof design. To restart after the emergency stop, simply pull the operating button. The special push button design prevents the VITATIO from getting jammed and therefore guarantees the emergency stop function.

- Fool-proof
- Protected against jamming
- Standardised connectors
- Same housing dimensions as the key switch VIARO
